ECON 370: Data Science for Economic Analysis

Treatment Effect Heterogeneity Project Worksheet

1. What is the name of the paper that you are replicating?

2. Who are the authors?

3. What journal was it published in?

4. Describe the authors' research question in 1–2 sentences.

5. Describe the intervention that the authors evaluate in 1–2 sentences.

6. Which table and column in the paper reports the authors' main results?

7. What is their main outcome of interest in that regression?

8. What treatment variables are included in the regression? What is/are the estimated impact?

9. What additional control variables are included in the regression?

10. Do the authors test for treatment effect heterogeneity? Along what dimensions? What specification or approach do they use? What do they find?
